1 Clean Man

Outside elegalizess is less then half the battle. A mon may scrub himself a dozen times a day, and still be uncleun. Good health meens cleanliness not only outside, but inside. It means a clean stomach, clean bowels, clean blood, a clean liver, and new, clean, healthy tissues. The man who is clean in this way will look it and act it. He will work with energy and think

clean, clear, healthy thoughts.

He will never be troubled with liver, lung, stomach or blood disorders. Dyspepsia and indigestion originate in unclean stom-achs. Blood diseases are found where there is unclean blood. Consumption and bronchitis mean unclean lungs.

Dr. Pierce's Golden Medical Discovery

prevents these diseases. It makes a man's insides clean and healthy. It cleans the digestive organs, makes pure, clean blood, and clean, healthy flesh,

It restores tone to the nervous system, and cures pervous exhaustion and prostration. It contains no alcohol or habit-forming of Constitution is the most unclean uncleanliness. " "leasant Pel-

> The state as a whole practically don- Write for booklet. bled its population between 1790 and 1800, and nearly doubled it again in the next 30 years. But since 1850 there has been little population gain. It had 314,-120 in 4850 and gained less than 1,000 in the decade to 1800. Under the high prices of the Civil war period, farming flourished and the state gained 15,500 in that decade, but from 1870 to 1910 there has been an advance only from 330,551 to 355,056. It gained less than 2,000 between 1870 and 1880, and less than 200 in the next decade. Compared with those 10-year periods, the last two make a decidedly good exhibit. But it is not nough-not what it should be, and not what may fairly be expected of the coming 10 years under the influence of factors now at work. The awingback of the westward agricultural drift lately observable is just beginning to reach that state, under the influence of high prices for farm products. The waterpowers are likely to come into greater use through storage and electrical transmission, and he automobile and better roads must ore and more have the effect of ineasing the number of those who seek est and recreation and quiet retirement among the hills of this most attractive mountain state. Beyond this Vermonters should look for advantage in the lowering of those tariff bars which turn amerce north and south away from the state, instead of letting it pursue its natural course through the state northwesterly and southeasterly between Canada and New England.—Springfield. Mass., Republican.
